ABOUT

QA Engineer with 5+ years of experience in manual testing of web and mobile applications across energy, fintech, and e-commerce. I cover the full QA cycle: writing test plans and test cases from scratch, running functional, regression, smoke, and integration testing, API testing, and bug tracking to ensure product quality. On my current project, I'm the sole QA responsible for Flutter mobile testing across iOS and Android. Currently exploring test automation with Playwright and Python.

WORK EXPERIENCE

SDH (*FieldHub - CRM platform, web and mobile*)

08/2025 – Present

QA Engineer

- Testing a CRM platform (web via Chrome, mobile via Flutter - iOS TestFlight, Android APK).
- Writing test cases and test plans from scratch.
- Functional, regression, and smoke testing.
- Bug tracking in Jira; test management in TestRail.
- Error monitoring via Sentry; log analysis via Chrome DevTools; API testing via Postman.
- Direct communication with developers and BAs on defect resolution.
- Sole QA engineer responsible for Flutter mobile testing across iOS and Android.
- Authored the test plan for the first full-scale regression cycle of the product.
- Contributed to building test documentation in TestRail from early adoption stage.

SIGMA (*Development and implementation of IT solutions for digitalization of energy*)

07/2022 – 06/2025

QA Engineer

- Testing web application (cross-browser: Chrome, Firefox) and Android mobile application (emulators and real devices).
- Sole QA engineer on a pilot project - built the testing process from scratch, working closely with developers from the design stage.
- Tested new modules and ran full regression testing for the version 2.0 release (comprehensive redesign of the core enterprise app).
- Planning, designing, and executing test cases and test scenarios.
- API testing (Postman, Swagger).
- Bug identification, documentation, and tracking in bug tracking systems.
- Collaboration with developers, designers, and stakeholders.

Bell Integrator (*IT outstaffing - placed at a banking client*)

12/2021 – 05/2022

QA Engineer

- Testing web banking application (Chrome) - mainly the main payments page.
- Personal account / client profile testing.
- Verified data via REST requests and database queries.
- Built test cases and checklists from scratch for these modules.
- Verifying updates and releases for reliability.
- Creating and maintaining test plans, test reports, and defect logs.

AllForDJ (*Website customers experience online shopping via comfortable browsing interface*)

07/2021 – 11/2021

QA Engineer

- Testing the online store's website - checkout, product search, and cart functionality.
- Testing the admin panel/CMS - product catalog management and order management.
- Maintaining website.
